

HCNE GB0-360

Design Enterprise-level Networks

Thank You for Downloading GB0-360 Updated Exam Questions

<https://certs4sale.com/huawei/gb0-360-pdf-exam-dumps>

Question: 1

Which are the advantage of the hierarchical network design model?

- A. Easy to extend
- B. Easy for diagnosis and troubleshooting
- C. Easy for management
- D. Cost saving

Answer: ABCD

Question: 2

A topology has to be chosen for a LAN or a WAN. Which topology has the smallest delay, the highest reliability but the most complicate management?

- A. Star
- B. Tree
- C. Ring
- D. Mesh

Answer: D

Question: 3.

Which of the following is the network operation system that Huawei has intellectual proprietary and it supports multiple equipments of Huawei?

- A. IOS
- B. DOS
- C. VRP
- D. Quidway

Answer: C

Question: 4.

All work stations can make full use of the bandwidth in the CSMA/CD network.

- A. True
- B. False

Answer: B

Question: 5

Which of the following support data forwarding and path selection?

- A. S3026E
- B. S3526E
- D. Hubs

Answer: BC

Question: 6

A frame relay network can be full-meshed. If there are 6 routers connected to the frame relay network, the required number of PVCs will be.

- A. 6
- B. 5
- C. 15
- D. 30

Answer: C

Question: 7.

POS is a technology to bear IP and other packets over the SONET/SDH. Which layer is POS defined in the OSI model?

- A. Data link layer
- B. Physical layer
- C. Network layer
- D. Transport layer
- E. Application layer

Answer: A

Question: 8.

To transmit IP voice, compression algorithm is adopted, such as the frequently used G.729. After compressed, what is the bandwidth seized by a channel of voice?

- A. 75Kbps
- B. 12Kbps
- C. 64Kbps
- D. 8Kbps

Answer: B

Question: 9.

Which of the following can be aggregated into one Route entry 10.0.24.0/21?

- A. 10.0.25.0/24
- B. 10.0.23.0/24
- C. 10.0.26.0/24
- D. 10.0.22.0/24

Answer: AC

Question: 10.

The DR in the OSPF is to reduce the amount of broadcast and to decrease the Link State Database synchronization times between routers in the NBMA network. However, it is meaningless when there are less than 3 routers in the network. So it is unnecessary to elect the DR when there are only 2 routers in the broadcast and Ethernet network.

- A. True
- B. False

Answer: B

Question: 11.

To guarantee that backup is enabled while the network storm is prevented when designing LAN, the SPANNING TREE technology or TRUNK port aggregation technology can be adopted.

- A. True
- B. False

Answer: A

Question: 12.

Which of the following descriptions of the security of the leased line access method are true?

- A. As a traditional access mode, the leased line transmits data in the transparent channel mode in the physical layer. The semipermanent connection is performed between two points by the line providers, so the line is of high security.
- B. The secure access control and the authentication interworking are considered for this access method.
- C. Encryption can be adopted in the leased line for a higher security
- D. All the above descriptions are false

Answer: ABC

Question: 13.

Which of the following descriptions of the PQ queue strategy are true?

- A. PQ can provide different priorities to different service data packets, and can provide absolute priority to the high priority packet.
- B. PQ is used to guarantee the delay of the real-time application sensitive to the time like VOIP.
- C. As CQ, PQ needs to be configured, but its processing speed is faster.
- D. Because PQ cannot restrict the bandwidth of the high priority packet, the low priority packet may get no bandwidth.

Answer: ABD

Question: 14.

Which of the following items should be considered when making network plan?

- A. Equipment purchase
- B. Analysis of the physical locations and the requirements of the customers
- C. IP address planning
- D. Network equipment deployment
- E. Network topology designing

Answer: BCE

Question: 15.

Which of the following are needed to construct an Enterprise network?

- A. Operation system
- B. PCs
- C. Routers
- D. Ethernet switch

Answer: ABCD
