What is a "measure"?

- A. Data that can be aggregated across the client's dimensions; i.e. currencies, can be formula-based.
- B. Data elements that can be Searched or made available through the transaction view.
- C. The total spend reflected in the spend cube.
- D. Data the client intends to filter or further breakdown; used to run crosstabs and submit feedback.

Answer: A

Question: 3

Identifying poor performing suppliers for mission critical categories is enabled by?

- A. Supplier Qualification
- B. Supplier Evaluation
- C. Supplier Development
- D. Supplier Risk

Answer: B

Question: 4

Which of the following is an example of Sourcing allowing an organization to streamline the Award process?

- A. RFP award passed directly to contract.
- B. RFP bids exported to Excel for offline negotiation.
- C. Suppliers proposing specific items they should be awarded with based on capability.
- D. Team members linked to an RFx being able to communicate with one another via instant

messaging within an RFX.

Answer: A

Question: 5

What is a bookmark?

- A. Saves the state of a page in the Dimensions view. The filters, dimension window positions and settings, graphs, cross-tab charts, menus and reports for the Spend Analyzer are all preserved for later reference.
- B. Helps the user analyze data minutely. He/she can apply multiple filters to the data and also apply parallel filters, where he/she can filter data using multiple rows in the same dimension.
- C. Contains multiple panels. Each panel in turn contains select data that the user wants to view in a tabular or graphical format. Dashboards are customizable and users can apply filters to a panel. Applying filters on one panel correspondingly applies filters to the other panels on the dashboard.
- D. Saves the last view the user was on when he/she logs out of the system.

Answer: A
