Question No : 1

Consider a FileMaker Pro 8 database hosted by FileMaker Server 8. Two users, A and B, are accessing the database at the same time, and both are viewing records with the same layout. User A runs a script that loops through a found set, changing data in each record. Which statement is true?

- A.** User B may see changes to record data resulting from User A's script before the script completes.
- B.** User B will not see any changes to record data resulting from User A's script until the loop in the script ends.
- C.** User B will not see any changes to record data resulting from User A's script until the script completes in its entirety.
- D.** User B will only see changes to data resulting from User A's script if the script contains a Commit Records/Requests [] script step.

Answer: A

Question No : 2

Which three technologies/products may be used in conjunction with FileMaker Server 8 Advanced to produce custom Web pages? (Choose three.)

- A.** JSP
- B.** UML
- C.** PHP
- D.** CDML
- E.** XSLT

Answer: A,C,E

Question No : 3

When FileMaker Server 8 is set to Secure connections to FileMaker Server, which two statements are true? (Choose two.)

- A.** Secure connections are typically faster because of data encryption.
- B.** Secure Sockets Layer (SSL) is used by FileMaker Pro 8 client connections.

- C. Connections between FileMaker Server 8 and FileMaker Pro 8 are encrypted.
- D. Connections between FileMaker Server 8 Advanced and XML clients are encrypted.

Answer: B,C

Question No : 4

What are three values you can retrieve using a Get() function? (Choose three.)

- A. the name of the active window
- B. the list of users logged into the file
- C. the password of the logged-in user
- D. the state of the Omit check box when in Find mode
- E. the absolute path to the desktop directory for the current user

Answer: A,D,E

Question No : 5

Which three are required to get XML data, using a Web browser, from a database hosted by FileMaker Server 8 Advanced? (Choose three.)

- A. a query string in an HTTP URL request
- B. the FMPDSORESULT or fmresultset grammar
- C. at least one account with the fmxml extended privilege assigned to its privilege set
- D. XML Publishing enabled in the Web Publishing Administration Console
- E. the Export Records [FMPDSORESULT] or Export Records [FMPXMLRESULT] script step included in a script set to run when the database opens

Answer: A,C,D

Question No : 6

Click the Exhibit button.

Given a layout including the Tab Control shown in the exhibit, what are two valid methods to navigate to the Phones tab? (Choose two.) Note: None of the contents of the Phones tab exist anywhere else on the layout.

Address		Phones	Orders
Home	(408) 355-1122	Mobile	
Work	(408) 987-7000	Other	

- A.** You perform a script that includes Go to Field [] targeting one of the fields on the Phones tab.
- B.** You perform a script that includes Go to Tab [] targeting the Phones tab and one of the fields in the tab.
- C.** You use the Tab key until the Tab Control becomes active, then navigate to Phones using Arrow keys and press the Space bar. This works only if the Tab Control is included in the layout's Tab Order.
- D.** You use the Tab key until the Tab Control becomes active, then navigate to Phones using Arrow keys and press the Space bar. This works only if at least one field in the Phones tab is included in the layout's Tab Order.

Answer: A,C

Question No : 7

What two statements are true for FileMaker Pro 8 Advanced? (Choose two.)

- A.** The Data Viewer can only be used while debugging scripts.
- B.** The Script Debugger allows you to view any currently running script.
- C.** Using the Active Scripts pane in the Script Debugger, you can temporarily disable sub-scripts.
- D.** Using the Set Next Script Step function in the Script Debugger, you can alter the order in which sub-scripts execute.
- E.** Using the Halt Script function in the Script Debugger, you can stop the execution of a sub-script and return to the script that called it.

Answer: B,D

Question No : 8

Which two statements are true regarding the use of plug-ins? (Choose two.)

- A. Plug-ins provide additional script step capabilities.
- B. Plug-ins provide additional calculation capabilities.
- C. The Auto Update feature is implemented with a plug-in.
- D. Plug-ins can only be used on FileMaker Pro 8 and FileMaker Pro 8 Advanced.

Answer: B,C

Question No : 9

Which two settings affect an Account that is authenticated via FileMaker but not an Account that is authenticated via an External Server? (Choose two.)

- A. Manage extended privileges
- B. Allow user to modify their own password
- C. User must change password on next login
- D. Disconnect user from FileMaker Server when Idle

Answer: B,C

Question No : 10

Which three statements are true about field auto-entry options in FileMaker Pro 8? (Choose three.)

- A. Some auto-entry options are performed upon exiting a modified field.
- B. If you auto-enter a looked-up value into a field, the field cannot be indexed.
- C. You can specify auto-entry options for all field types, except summary and calculation fields.
- D. You can specify whether serialized values are generated when records are created or when they are committed.
- E. The only fields from an unrelated table that can be auto-entered using the "Looked-up value" option, are fields set to have global storage.

Answer: A,C,D
