Question: 1

Which two of the following are true about a Restore Request? (Choose two.)

- A. You can Create, Modify, or Delete a Restore Request
- B. You cannot Modify a RestoreRequest
- C. Restore Request cannot be saved
- D. A Restore Request can be saved
- E. A Restore Request is required to put data back to the database

Answer: A,D

Question: 2

Optim relationships are used by all Optim tools. If multiple relationships exist between a pair of tables, which two statements are true? (Choose two.)

- A. Optim will not allow you to create duplicate relationships between tables.
- B. Optim will view two relationships between tables as possible duplicates and ignore one.
- C. Optim will view two relationships between tables as possible duplicates but will still use both if selected.
- D. Optim allows duplicate relationships but will ignore them if they are in fact duplicate.
- E. Optim will keep cycling until all relevant rows have been found.

Answer: C,E

Question: 3

Which two actions ensure the development of a quality, repeatable Test Data Management (TDM) process? (Choose two.)

- A. building and running Optim extract and convert requests
- B. comparing the output of convert requests with the output of archive requests
- C. setting up indices to ensure that restore functions perform adequately
- D. running load/insert requests to populate target test databases
- E. building test DBMS environments and subsystems

Answer: A,D

Question: 4

Why would you use the Optim File Maintenance Facility?

- A. To remove rows from registered Archive Files and compress Archive and Extract Files.
- B. To update Archive File Indexes and Register Archive Files that have been moved from their original location.
- C. To remove rows from registered Archive and Extract Files and compress Archive and Extract Files.
- D. To remove rows from registered Archive Files, Extract Files, and database load files, and compress Archive, Extract, and database load Files.

Answer: A

Question: 5

When setting up Optim Connect Studio, which of the following is true?

- A. Only one binding can be defined for each machine.
- B. Optim Connect Studio does not support renaming a binding.
- C. Parallel processing and Query Processor parameters are defined on the Server tab.
- D. Registration of the product is done using Optim Configuration.

Answer: B

Question: 6

The customer has critical production systems against which Optim archive and delete processes are run. If Optim archive and delete processes are run at the wrong time, it will impact business. Which of the following will resolve the issue?

- A. Using the Optim Configuration program, initialize Optim Security and assign a Security Administrator. For each role, grant or deny the appropriate privileges.
- B. Configure object security, which will deny access to sensitive production objects.
- C. By default, the Access Control Domain allows or denies access to particular Optim functions.
- D. Configure program security to restrict access to the Optim executables.

Answer: A

Question: 7

Given the following command-line export command: PROCMND /EXPORT TYPE=EX

NAME=%% Which required parameter is missing from this syntax?

- A. The name of the export file is missing.
- B. The name of the report file is missing.
- C. The name of the Optim Directory is missing.
- D. The name of the parameter file is missing.

Answer: A

Question: 8

When creating an Access Definition, why it is important to remember when a relationship is traversed from child to parent?

- A. Any selection criteria used for the parent table determines the rows retrieved.
- B. Any selection criteria for the parent table is ignored.
- C. Any selection criteria for the child table is ignored unless used in an "AND" selection.
- D. Any selection criteria on the child table is automatically inherited by the parent table.

Answer: B

Question: 9

After an Archive File and associated Archive Index has been created, you discover that you need to add an additional column to the Archive File Index. Which process would Optim support to accomplish this task?

- A. Use the Optim Utility Menu to Access the Archive Index Maintenance Function. Select the appropriate index from the menu and delete it.
Create a new Archive Index with the appropriate columns and save this index.
- B. Since the Archive File cannot be modified, you must create an additional Archive Index with the correct columns and instruct your users to use this index when performing queries against the Archive File.
- C. Use the Optim Utility Menu to Access the Archive Index Maintenance Function. Select the appropriate table and modify the Archive Index with the additional columns needed. Execute this modification and then save it.
- D. Once created, Archive Indexes cannot be deleted or modified. You must restore the archived data to a database and then run the Archive Request again (creating a new Archive File) while specifying the correct Archive Index as part of the Archive Request.

Answer: C

Question: 10

Given the command line syntax shown below: PROCMD /RJOB=PERSONNEL'
OUTPUT=PER.TXT MONITOR+ QUIET+ PROCMD /R JOB=?PERSONNEL'
OUTPUT=PER.TXT MONITOR+ QUIET+ Which task is performed?

- A. Runs the job named PERSONNEL, places the process report output in a file named PER.TXT, and displays prompts and error dialogs during the process.
- B. Schedules a job named PERSONNEL, stores the extracted data in a file named PER.TXT, and displays information dialogs during the process.
- C. Runs the job named PERSONNEL, places the process report output in a file named PER.TXT, and displays information dialogs during the process.
- D. Schedules the job named PERSONNEL, stores the extracted data in a file named PER.TXT, and displays prompts and error dialogs during the process.

Answer: C
