### QUESTION: 1

A user wants to transfer the work order status updates and resource transaction data for costed resources to Cost Management. Which scheduled process should you run to achieve this requirement?

- Option A : Transfer Cost to Cost Management
- Option B : Transfer Transactions to Costing
- Option C : Transfer Ledger Balances
- Option D : Transfer General Ledger Balances to Balance Cubes

**Correct Answer: A**

### QUESTION: 2

A production Supervisor has noticed that Work Orders created manually are overwritten by the plan runs executed by Planning Central. After discussing this issue with the Planner, two actions are recommended to prevent the Work Orders from being overwritten by plan runs. Identify the two recommendations.

- Option A : Update Supply Plan Options, Overwrite Firm Planned Orders = None.
- Option B : Update Firm flag in the Details region of the Edit Work Definition page.
- Option C : Update Firm flag in the Details region of the Edit Work Definition Names page.
- Option D : Update Firm flag in the Details region of the Edit Work Order page.

**Correct Answer: A,D**

### QUESTION: 3

Your customer has multiple distribution centers and a few manufacturing plants. Plants make different items with some overlap between them in terms of products manufactured. The distribution centers stock parts from all plants. A Corporate Engineering team is responsible for centrally defining items and catalogues. This team defines the items and sets the attributes for most parameters. The respective distribution centers and manufacturing plants are allowed to change some attributes locally. Identify two different ways of achieving this requirement.

- Option A : Set up Plants as Inventory Organizations, Distribution Centers as Item Organizations, and Corporate Engineering organization as Inventory Organization.
- Option B : Set up Plants as Inventory Organizations, Distribution Centers as Inventory Organizations, and Corporate Engineering organizations as Item Organization.

Option C : Set up Plants and Distribution Centers as Inventory organizations and Corporate Engineering organization as Item Organization

Option D : Set up Plants and Distribution Centers as Inventory organizations and Corporate Engineering organization as Inventory Organization.

Option E : Set up Plants as Inventory Organizations, Distribution Centers as Item Organizations, and Corporate Engineering organization as Item Organization.

**Correct Answer: B,C**

#### QUESTION: 4

Your customer has the following business requirement. There are two work definitions created in the application. One Work Definition for Engine Finished Good and other Work Definition for Pallet Finished Good. The Engine Finished Good item should have Pallet Finished Goods as one of its component. Identify the way to establish the relationship between Pallet and Engine Work Definitions.

Option A : Create a Subinventory that could be the completion Subinventory for yielding the pallet and then the same Subinventory can serve as the supply Subinventory of the pallet in the Work Definition created for Engine.

Option B : Assign a higher priority to the Work Definition created for Engine and a lower one for the Work Definition for Pallet.

Option C : The two Work Definitions can be tied through Project or Seiban numbers.

Option D : The Work Definition versions can be used to tie the Work Orders.

**Correct Answer: D**

#### QUESTION: 5

The production user wants to report Work Order completion. Identify two ways of reporting the progress of work order at work order operation level.

Option A : Change Move status to Ready.

Option B : Complete using quantity completion

Option C : Complete with Details

Option D : Quick Complete

Option E : Change status of Operation to completed
