QUESTION: 1

How do billing and licensing work for Oracle Database@AWS?

- Option A : You receive separate invoices from AWS and Oracle, with no consolidation.
- Option B : You receive a single invoice via AWS Marketplace that contributes to AWS commitments and Oracle Support rewards.
- Option C : Only Oracle Support rewards are counted, AWS commitments are excluded.
- Option D : Licensing is handled entirely outside AWS Marketplace and does not affect AWS billing.

Correct Answer: B

QUESTION: 2

Where are the Data Pump files created during ZDM Logical Offline migration to Exadata Database on Dedicated Infrastructure in Oracle Database AWS?

- Option A : Amazon S3
- Option B : NFS Share on Amazon Elastic File System (EFS) mounted on the source and target database hosts
- Option C : ONFS Share on Amazon Elastic Block Store (EBS) mounted in the ZDM host
- Option D : Local storage in the Exadata Database server

Correct Answer: B

QUESTION: 3

During a PCI DSS compliance audit, an Auditor highlights gaps where shared credentials are used and some privileged actions are not logged. What must you do to ensure that administrative access is restricted and actions are auditable?

- Option A : Share a single root account and rely on CloudTrail for logging.
- Option B : Depend solely on VPC firewall rules to control administrative access.
- Option C : Enforce IAM policies with least privilege, require MFA for all Admins, and enable CloudTrail to log administrative actions.
- Option D : Disable CloudTrail to reduce storage costs and use manual reporting.

Correct Answer: C

QUESTION: 4

During an internal audit, the Compliance team asks for a record of all API calls and user activities in Oracle Database@AWS. Which AWS service must you enable to provide this information?

- Option A : AWS CloudWatch
- Option B : AWS CloudTrail
- Option C : Amazon Macie
- Option D : Amazon GuardDuty

Correct Answer: B

QUESTION: 5

When the AWS ODS network is launched, OCI automatically creates a VCN with two DNS Resolver endpoints. Which endpoint is responsible for sending DNS queues from OCI to AWS?

- Option A : Listener endpoint
- Option B : Forwarder endpoint
- Option C : inbound endpoint
- Option D : Outbound endpoint

Correct Answer: D
