QUESTION: 1

Which two statements are true when using Measure catalogs? (Choose two.)

Option A : The predefined measure catalog is not the system default.

Option B : The measure catalog has a collection of measures that you can enable for use in a single plan in the Planning Central work area.

Option C : You can restrict access to Measure Catalogs using Administer Data Security.

Option D : You can add or remove measures from a measure catalog.

Option E : Measure catalogs are defined in the system to improve the performance of the plan.

Option F : You navigate to Configure Measure Catalogs to edit the Catalog.

Correct Answer: B,D

Explanation/Reference:

Measure Catalogs: Explained

The measure catalog is similar to the dimension catalog. Each measure catalog has a collection of measures that you can enable for use in a single plan in the Planning Central work area. Oracle provides predefined measures from which to select to perform any type of analysis.

On the Configure Planning Analytics page, Measure Catalogs tab, you can create a measure catalog and add or remove measures from a measure catalog.

The predefined measure catalog is the system default. When you create a new plan, the measure catalog that is used is based on the **Default** check box located on the Measure Catalogs tab. If you change the default later, the plan would continue to use the same measure catalog that it was created with.

Can I modify the default measure catalog?

No. The default measure catalog is a predefined catalog with over 200 measures available in Supply Chain Planning. Although you cannot modify the default measure catalog, you can create a custom measure catalog, modify the list of measures, and assign it to plans on the Plan Options page.

QUESTION: 2

You've decided to opt into the Customer Demand Collaboration feature. Which three statements describe what that enables?

Option A :

A customer can use B2B messaging to share their expected needs and historical consumption for the products you sell them.

Option B : The information they share with you is informational and only available to you in the portal.

Option C : A customer can log in to a portal and manually enter their expected needs for the products you sell them.

Option D :

You can post to the portal your statistical forecast for the products you sell them so they can see your forecast for them

Correct Answer: A,C,D

Explanation/Reference:

The Customer Demand Collaboration feature enables customers to share their demand forecasts via B2B messaging or manually through a portal. Additionally, you can share your forecast with them through the portal, facilitating mutual insight into supply chain needs and expectations, as detailed in Oracle's customer demand collaboration features documentation MY ORACLE SUPPORT

QUESTION: 3

A major distributor experiences difficulty in establishing an inventory replenishment methodology. Which segmentation approach is not possible with Replenishment Planning?

Option A : to group items based on item attributes for the product and customer dimensions and then assign a replenishment policy to each group

Option B : to group items based on user-defined attributes and then assign a replenishment policy to each group

Option C : to group items based on similar global consumption levels and then assign a replenishment policy to each group

Option D : to group items based on similar consumption levels by warehouse and then assign a replenishment policy to each group

Correct Answer: A

QUESTION: 4

Should value in Adjusted Shipments Forecast measure always be equal to the Final Shipments Forecast measure?

Option A : Yes, if the adjustment is made below the aggregation level at which it is viewed.

Option B : Yes, if the adjustment is made at the same aggregation level at which it is viewed, or below.

Option C : No, both measures will always be different.

Option D : Yes, if the demand plan is approved and values are locked.

Option E : Yes,if the demand plan hasn't been run again after adjustment.

Correct Answer: B

QUESTION: 5

Your client wants to create a supply plan that only considers sales order and disregards forecast demand within a specific demand horizon. What must you do to accomplish this?

Option A : Manage Plans > Search and select supply plan > Supply tab > Organizations and Schedules tab > Remove all demand schedules

Option B : Manage Plans > Search and select demand plan > Demand tab > General tab > Select 'Do no spread forecast'

Option C : Manage Plans > Search and select demand plan > Demand tab > General tab > Check Demand Time Fence Control

Option D : Manage Plans > Search and select supply plan > Supply tab > General tab > Advanced Options > Check 'Create time fence'

Option E : Manage Plans > Search and select supply plan > Supply tab > General tab > Check Demand Time Fence Control

Correct Answer: A

QUESTION: 6

What happens when a demand planner approves a demand plan and then adjusts shipment history and runs demand plan again?

Option A : The approve action takes the data from the two final forecast measures and copies to Approved Final Shipments Forecast and Approved Final Bookings Forecast, respectively. After a forecast is approved, the approved values remain unchanged until the forecast is approved again.

Option B : The approve action makes the Adjusted Shipments Forecast and Adjusted Bookings Forecast measures 'not editable.' After a forecast is approved, the Final Shipments Forecast and Final Bookings Forecast measures remain unchanged until the forecast is approved again.

Option C : The approve action makes the Adjusted Shipments Forecast and Adjusted Bookings Forecast measures 'not editable.' But any subsequent demand plan run can change Final Shipments Forecast and Final Bookings Forecast values.

Option D : The approve action takes the data from the two final forecast measures and copies to Approved Final Shipments Forecast and Approved Final Bookings Forecast, respectively. Any subsequent demand plan run can change final shipments or bookings forecast values that will automatically update the approved forecast measures.

Correct Answer: A

QUESTION: 7

Which is the correct sequence of possible solutions that a constrained plan might consider when attempting to resolve a capacity or resource overload?

Option A : First alternate resources, then substitute components, then alternate work definitions and item structures, and finally, alternate suppliers and source organizations.

Option B : First alternate suppliers, then alternate resources, then substitute components, then alternate work definitions and item structures, and finally, alternate source organizations.

Option C : First substitute components, then alternate resources, then alternate work definitions and item structures, and finally, alternate suppliers and source organizations.

Option D : First alternate item structures, and work definitions, then substitute components, then alternate resources, and finally, alternate suppliers and source organizations.

Correct Answer: A

QUESTION: 8

Which four actions does Demand Management enable you to do? (Choose four.)

Option A : Run an unlimited number of forecast simulations to see impacts of changes in the price, running a marketing campaign, shift in weather, demand upside request, and so on.

Option B : Simulate changes to the dependent options forecast for build to stock items.

Option C : Perform side-by-side analysis on a multiple number of scenarios, and see the impact on operational and financial objectives.

Option D : Simulate how changes to forecasting models and parameters have an immediate impact on the statistical forecast.

Option E : Simulate the impact of introducing new products in particular geographic areas.

Correct Answer: A,C,D

QUESTION: 9

You want to understand what your inventory turns are for your organization. Where can you see this information in Planning Central?

Option A : Manage Planning Analytics

Option B : Manage Planning Measures

Option C : View Planning Analytics

Option D : Manage Metrics

Option E : Plan Summary

Correct Answer: A

QUESTION: 10

Your client manufactures consumer electronics and has all facilities live on Oracle Cloud. Their latest product has a very complicated manufacturing process and therefore can only be made at one facility (Organization ABC). However, it is ordered all over the world. How should the Sourcing Rule be set up to accomplish this?

- Option A : A global sourcing rule for 50% make at ABC and 50% buy from ABC
- Option B : A local sourcing rule for 100% make at ABC; a global sourcing rule for 100% transfer from ABC
- Option C : A local sourcing rule for 100% make at ABC; a global sourcing rule for 100% buy from ABC
- Option D : A local sourcing rule for 100% buy from ABC; a global sourcing rule for 100% transfer from ABC
- Option E : A global sourcing rule for 100% make at ABC; a local sourcing rule for 100% transfer from ABC

Correct Answer: D

QUESTION: 11

During an implementation, customer is in the process of planning supply requirements. Customer also needs to generate forecast and safety stock levels. Which plan type on the plan options should the customer be running?

- Option A : Demand and Supply Plan
- Option B : Safety Stock and Forecast Plan
- Option C : Demand Plan
- Option D : Supply Plan
- Option E : Integrated Plan

Correct Answer: A

QUESTION: 12

You are setting up the plan page layout for your customer. In which of these requirements would you use an Infotile?

- Option A : Showing customer demand trend over a specific time period
- Option B : Showing inventory values by product category
- Option C : Showing a breakdown of exception in a pie chart
- Option D : Showing on-hand value compared to targets
- Option E : Showing inventory value across time

Correct Answer: A

QUESTION: 13

You've decided to opt into the Customer Demand Collaboration feature. Which three statements describe what that enables?

Option A :

A customer can use B2B messaging to share their expected needs and historical consumption for the products you sell them.

Option B : The information they share with you is informational and only available to you in the portal.

Option C : A customer can log in to a portal and manually enter their expected needs for the products you sell them.

Option D :

You can post to the portal your statistical forecast for the products you sell them so they can see your forecast for them.

Correct Answer: A,C,D

Explanation/Reference:

Enabling the Customer Demand Collaboration feature allows customers to share demand data through B2B messaging or by manually entering it via a portal. Additionally, it supports sharing your forecasts with them, enabling a collaborative planning approach that enhances demand visibility and aligns expectations MY ORACLE SUPPORT
