Question: 1

A VxRail cluster primarily integrates which VMware components?

- A. NSX, Horizon, App Volumes
- B. vSphere, vSAN, vCenter
- C. vCloud Director, vROps
- D. VMware Tanzu only

Answer: B

Explanation:

VxRail is a hyperconverged infrastructure solution built on VMware vSphere, vSAN, and vCenter. These components provide compute, storage, and centralized management. Dell tightly integrates and validates this software stack.

Question: 2

Which component manages lifecycle operations in a VxRail environment?

- A. vCenter Server
- B. vSAN Health Service
- C. VxRail Manager
- D. Dell Secure Connect Gateway

Answer: C

Explanation:

VxRail Manager orchestrates lifecycle management including firmware, drivers, and VMware software updates. It performs pre-checks and coordinates rolling upgrades. This ensures validated, automated updates.

Question: 3

What is required before initializing a VxRail cluster?

- A. Active Directory integration
- B. IP address and DNS planning
- C. External backup software
- D. NSX deployment

Answer: B

Explanation:

VxRail initialization requires proper network planning including IP addresses, DNS, and NTP settings. These values are used during automated deployment. Incorrect planning can cause deployment failures.

Question: 4

Which VxRail operation allows adding compute and storage capacity?

- A. Disk replacement
- B. Cluster expansion
- C. Snapshot creation
- D. Firmware rollback

Answer: B

Explanation:

Cluster expansion adds new nodes to increase both compute and storage resources. VxRail Manager validates compatibility and automates node addition. This enables seamless horizontal scaling.

Question: 5

Which feature checks cluster readiness before a software upgrade?

- A. vSAN Resync Monitor
- B. Pre-upgrade health check
- C. Secure Connect Gateway
- D. Cluster shrink workflow

Answer: B

Explanation:

Pre-upgrade health checks validate cluster status, disk health, and network connectivity. They help detect issues that could cause upgrade failures. This step is mandatory before lifecycle operations.
