Question: 1.

What is a resource agent?

- A. It is a JMX-based monitoring tool that is accessible using Documentum Administrator.
- B. It is a feature of Application Builder, used to help manage lifecycles.
- C. It is a process used in conjunction with the Index Server to provide full-text indexing.
- D. It is a feature of WDK which allows administrators to more easily deploy components given to them by a developer.

Answer: A

Question: 2.

When using a resource agent to view a log, which option CANNOT be used to sort the log entries?

- A. Log level
- B. Event type
- C. Severity
- D. From the first entry to the last entry

Answer: B

Question: 3.

How do you delete a repository?

- A. use Documentum Administrator to delete the files used for the repository's tablespaces
- B. use Documentum Server Manager
- C. select Configuration > Repository option in Documentum Administrator
- D. use any database utility to drop the tablespaces used by the repository

Answer: B

Question: 4.

What is the correct API syntax for retrieving the r_object_id of a dm_document with the name, 'test1'?

- A. retrieve,c,dm_folder where object_name='test1'
- B. id,c,select dm_sysobject where object_name='test1'
- C. retrieve,c,select dm_document where object_name='test1'
- D. id,c,dm_sysobject where object_name='test1'

Answer: D

Question: 5.

A user has left your company. There is an object that is still checked out by that user. How would you remove the lock from this document?

- A. delete the user using Documentum Administrator and all the documents checked out to this user will automatically have the lock removed
- B. change the r_lock_owner attribute of the document to "dmadmin"; dmadmin will now own the document and can cancel checkout
- C. unlock the document using the API
- D. check the document in using a superuser account

Answer: C

Question: 6.

What must exist in an API script to dump your repository?

- A. dump,c,dmr_content
- B. dump,c,dmr_containment
- C. create,c,dmi_dump_object_record
- D. create,c,dm_dump_record

Answer: D

Question: 7.

Your repository dump has just completed. <DUMP_RECORD_OBJECT_ID> is the object id of your dm_dump_record. Which DQL statement would you run to determine how many repository objects were copied into your dump file?

- A. `select count(*) from dmi_dump_object_record where dump_object = '<DUMP_OBJECT_RECORD_ID>'`
- B. `select count(*) from dm_sysobject where r_object_id in (select <DUMP_OBJECT_RECORD_ID> from dm_dump_record)`
- C. `select count(*) from dm_dump_record where dump_object = '<DUMP_OBJECT_RECORD_ID>'`
- D. `select count(*) from dmr_content where r_object_id = '<DUMP_OBJECT_RECORD_ID>'`

Answer: A

Question: 8.

Which statement is FALSE regarding resource agents?

- A. Resource agents allow you to specify a minimum log level to view.
- B. Resource agents allow you to change configuration settings.
- C. Resource agents provide another way to receive notifications.
- D. Resource agents cannot execute operations.

Answer: D

Question: 9.

In addition to a supported OS, what is the minimal requirement for a successful Content Server installation and repository configuration?

- A. database software and Java SDK
- B. Java SDK
- C. database software, Java SDK, and application server
- D. database software

Answer: D

Question: 10.

A repository has an installation owner account 'dmdadmin' and a repository owner account 'sop.' What is the difference between these two accounts?

- A. The Documentum installation owner and the repository owner accounts have identical roles.
- B. The Documentum installation owner is a regular user in a repository; the repository owner has administrative rights over the repository.
- C. The Documentum installation owner is a superuser in the repository; the repository owner account owns the database tables used by the repository.
- D. While both users have administration privileges, the installation owner owns the repository database tables.

Answer: C

Question: 11.

What are the minimal user account settings and access rights needed by the designated BOF Global Registry user?

- A. The user has an inline password and has READ only access to the /System/Modules/SBO folder in the repository.
- B. The user has an OS or Directory Server account and has READ only access to the /System/Modules/SBO folder in the repository.
- C. The user has an inline password and has READ only access to the /System/Modules/SBO folder and the folders/documents in the repository that will be accessed using SBOs.

D. The user has an inline password and has READ only access to the entire repository.

Answer: A

Question: 12.

Which user account will be used when running the Repository Configuration program?

- A. superuser
- B. installation owner
- C. web user
- D. database user

Answer: B

Question: 13.

By default, what is stored specifically in the DOCUMENTUM\dba\secure directory?

- A. keystore(s) for certificates used by LDAP over SSL
- B. encrypted database user passwords for repository owners
- C. encrypted passphrase for the Content Server installation
- D. keystores used for Trusted Content Services

Answer: C

Question: 14.

Which specific directories do the DM_HOME and DOCUMENTUM environment variables represent in a Content Server installation with one or more repositories?

- A. DM_HOME is the base directory for all Content Server binaries and repository configurations; DOCUMENTUM is the working directory used by server processes.
- B. DM_HOME is the directory for the Content Server binaries; DOCUMENTUM is the base directory under which all binaries and repository configurations are stored.
- C. DM_HOME is the base directory under which all binaries and repository configurations are stored; DOCUMENTUM is the directory for the Content Server binaries.
- D. DM_HOME and DOCUMENTUM have the same value and point to the base directory for all server binaries and repository configurations.

Answer: B
