Question: 1

Which cache management algorithm is based on the assumption that data will not be requested by the host when it has not been accessed for a while?

- A. LRU
- B. HWM
- C. LWM
- D. MRU

Answer: A

Question: 2

What does the area ID of the FC address identify?

- A. Group of ports within a switch
- B. An individual port within a fabric
- C. Location of the name server within the fabric
- D. Unique number provided to each switch in the fabric

Answer: A

Question: 3

An organization performs copy on first access (CoFA) replication to create a local replica of application data. To perform a successful restore, what should be considered?

- A. Source devices must be healthy
- B. Save location size must be larger than the size of all source devices
- C. Save location size must be equal to the size of all source devices
- D. All changes to the source and replica must be discarded before the restore starts

Answer: A

Question: 4

Which host component eliminates the need to deploy separate adapters for FC and Ethernet communications?

- A. Converged network adapter
- B. TCP Offload Engine NIC
- C. FCIP bridging adapter
- D. iSCSI host bus adapter

Answer: A

Question: 5

What is a function of unified management software in cloud computing?

- A. Defining cloud service attributes
- B. Consolidating infrastructure resources scattered across one or more data centers
- C. Metering based on usage of resources by the consumer
- D. Providing an interface to consumers to request cloud services

Answer: A

Question: 6

Which EMC product provides the capability to recover data up to any point-in-time?

- A. RecoverPoint
- B. NetWorker
- C. Avamar
- D. Data Domain

Answer: A

Question: 7

What is needed to perform a non-disruptive migration of virtual machines (VMs) between hypervisors?

- A. Hypervisors must have access to the same storage volume
- B. Physical machines running hypervisors must have the same configuration
- C. Hypervisors must be running within the same physical machine
- D. Both hypervisors must have the same IP address

Answer: A

Question: 8

Which iSCSI name requires an organization to own a registered domain name?

- A. IQN
- B. EUI
- C. WWNN
- D. WWPN

Answer: A

Question: 9

Which data center requirement refers to applying mechanisms that ensure data is stored and retrieved as it was received?

- A. Integrity
- B. Availability
- C. Security
- D. Performance

Answer: A

Question: 10

What describes a landing zone in a disk drive?

- A. Area on which the read/write head rests
- B. Area where the read/write head lands to access data
- C. Area where the data is buffered before writing to platters
- D. Area where sector-specific information is stored on the disk

Answer: A

Question: 11

What is a characteristic of unified storage?

- A. Supports multiple protocols for data access and managed through a single management interface
- B. Supports a common protocol for data access and managed through a unified management interface
- C. Provides compute, storage, and network virtualization products in one solution
- D. Stores all data in the form of objects and managed through a unified management interface

Answer: A

Question: 12

What defines the time taken to position the read/write head across the platter with a radial movement in a disk drive?

- A. Seek time
- B. Rotational latency
- C. Data transfer time
- D. Service time

Answer: A

Question: 13

What is a benefit of cloud computing over traditional computing?

- A. Reduces the time to provision and deploy new applications
- B. Eliminates consumer's IT operational expenditure
- C. Enables the use of proprietary APIs to access IT resources
- D. Lowers migration cost and prevents vendor lock-in

Answer: A

Question: 14

Which statement describes a denial of service attack?

- A. Prevents authorized users from accessing the resources and services
- B. Prohibits attempts to repair the resources and services after an attack
- C. Attempts to provide false information by impersonating someone's identity
- D. Prevents unauthorized users to access the resources and services

Answer: A

Question: 15

What is a key benefit of virtualization?

- A. Improved resource utilization
- B. Improved performance
- C. Enhanced interoperability
- D. Unlimited resource scaling

Answer: A
